Such forward-looking statements involve known and unknown risks, uncertainties and other factors that may cause the actual results, events or developments to be materially different from any future results, events or developments expressed or implied by such forward-looking statements. Such factors include, among others, the following: general economic and business conditions, both nationally and in the regions in which the Company operates; changes in business strategy or development/acquisition plans; environmental exposures; financing risk; existing governmental regulations and changes in, or the failure to comply with, governmental regulations; liability and other claims asserted against the Company; risk and uncertainties relating to the outbreak of the novel strain of the coronavirus identified as COVID-19 and other factors referred to in the Company's filings with Canadian securities regulators. Given these uncertainties, readers are cautioned not to place undue reliance on such forward-looking statements. The Company does not assume the obligation to update or revise any forward-looking statements.

SPECIFIED FINANCIAL MEASURES

Morguard Corporation reports its financial results in accordance with IFRS. However, this MD&A also uses specified financial measures that are not defined by IFRS, which follow the disclosure requirements established by National Instrument 52-112 *Non-GAAP and Other Financial Measures Disclosure*. Specified financial measures are categorized as non-GAAP financial measures, non-GAAP ratios, and other financial measures, which are capital management measures, supplementary financial measures, and total of segments measures.

NON-GAAP FINANCIAL MEASURES

Non-GAAP financial measures do not have any standardized meaning prescribed by IFRS and are not necessarily comparable to similar measures presented by other reporting issuers in similar or different industries. These measures should be considered as supplemental in nature and not as a substitute for related financial information prepared in accordance with IFRS. The Company's management uses these measures to aid in assessing the Company's underlying core performance and provides these additional measures so that investors may do the same. Management believes that the non-GAAP financial measures described below, which supplement the IFRS measures, provide readers with a more comprehensive understanding of management's perspective on the Company's operating results and performance.

The following discussion describes the non-GAAP financial measures the Company uses in evaluating its operating results:

ADJUSTED NOI

Net operating income ("NOI") and Adjusted NOI are important measures in evaluating the operating performance of the Company's real estate properties and are a key input in determining the fair value of the Company's properties. Adjusted NOI represents NOI (an IFRS measure) adjusted to exclude the impact of realty taxes accounted for under IFRIC 21 as noted below.

NOI includes the impact of realty taxes accounted for under the International Financial Reporting Interpretations Committee ("IFRIC") Interpretation 21, Levies ("IFRIC 21"). IFRIC 21 states that an entity recognizes a levy liability in accordance with the relevant legislation. The obligating event for realty taxes for the U.S. municipalities in which the Company operates is ownership of the property on January 1 of each year for which the tax is imposed and, as a result, the Company records the entire annual realty tax expense for its U.S. properties on January 1, except for U.S. properties acquired during the year in which the realty taxes are not recorded in the year of acquisition. Adjusted NOI records realty taxes for all properties on a *pro rata* basis over the entire fiscal year.

A reconciliation of Adjusted NOI is provided in "Part III, Review of Operational Results."

COMPARATIVE NOI

Comparative NOI is presented in this MD&A because management considers this non-GAAP financial measure to be an important measure of the Company's operating performance for properties owned by the Company continuously for the current and comparable reporting period and does not take into account the impact of the operating performance of property acquisitions and dispositions as well as properties subject to significant change as a result of recently completed development. In addition, Comparative NOI is presented in local currency isolating any impact of foreign exchange fluctuations and eliminates the impact of straight-line rents, realty taxes accounted for under IFRIC 21, lease cancellation fees and other non-cash and non-recurring items.

A reconciliation of Comparative NOI is provided in "Part III, Review of Operational Results."

FUNDS FROM OPERATIONS ("FFO") AND NORMALIZED FFO

FFO (and FFO per common share) are non-GAAP financial measures widely used as a real estate industry standard that supplements net income (loss) and evaluates operating performance but is not indicative of funds available to meet the Company's cash requirements. FFO can assist with comparisons of the operating performance of the Company's real estate between periods and relative to other real estate entities. FFO is computed by the Company in accordance with the current definition of the Real Property Association of Canada ("REALPAC") and is defined as net income (loss) attributable to common shareholders adjusted for: (i) deferred income taxes, (ii) unrealized changes in the fair value of real estate properties, (iii) realty taxes accounted for under IFRIC 21, (iv) internal leasing costs, (v) gains/losses from the sale of real estate or hotel property (including income tax on the sale of real estate or hotel property), (vi) transaction costs expensed as a result of a business combination, (vii) gains/losses on business combination, (viii) the non-controlling interest of Morguard North American Residential Real Estate Investment Trust ("Morguard Residential REIT"), (ix) amortization of depreciable real estate assets (including right-of-use assets), (x) amortization of intangible assets, (xi) principal payments of lease liabilities, (xii) FFO adjustments for equity-accounted investments, (xiii) provision for impairment, (xiv) other fair value adjustments and non-cash items. The Company considers FFO to be a useful measure for reviewing its comparative operating and financial performance. FFO per common share is calculated as FFO divided by the weighted average number of common shares outstanding during the period.

Normalized FFO (and Normalized FFO per common share) is computed as FFO excluding non-recurring items on a net of tax basis and other fair value adjustments. The Company believes it is useful to provide an analysis of Normalized FFO which excludes non-recurring items on a net of tax basis and other fair value adjustments excluded from REALPAC's definition of FFO described above.

A reconciliation of net income (loss) attributable to common shareholders (an IFRS measure) to FFO and Normalized FFO is presented in the section "Part III, Funds From Operations."

NON-CONSOLIDATED MEASURES

The Trust Indenture and Subsequent Supplemental Indentures (collectively, the "Indenture") that govern the Company's senior unsecured debentures ("Unsecured Debentures") are subject to the following definitions and covenants, and are calculated based on the Company's financial results, prepared in accordance with IFRS, adjusted to account for Morguard Real Estate Investment Trust ("Morguard REIT") and Morguard Residential REIT (collectively the Company's "Public Entity Investments"), using the equity method of accounting and other adjustments as defined by the Indenture described below ("Non-Consolidated Basis" or "Morguard Non-Consolidated Basis"). The presentation of Non-Consolidated Basis measures represents a non-GAAP financial measure and may not accurately depict the legal and economic implications of the Company.

The Company computes an interest coverage ratio, an indebtedness to aggregate assets ratio and an adjusted shareholders' equity covenant on a Non-Consolidated Basis and are presented in this MD&A because management considers these non-GAAP financial measures to be an important measure to evaluate and monitor the Company's compliance with its Indenture.

Non-Consolidated Basis adjustments include the following:

- An adjustment (as defined in the Indenture) to account for the Company's Public Entity Investments using the equity method of accounting. The adjustment requires the Public Entity Investments which are consolidated under IFRS to each respective financial statement line presented within the balance sheet and statement of income (loss) to be presented on a single line within equity-accounted investments;
- An adjustment (as defined in the Indenture) to the balance sheet to exclude deferred tax assets and liabilities, goodwill and to add back accumulated amortization of hotel properties; and
- An adjustment (as defined in the Indenture) to the statement of income (loss) to exclude other non-cash items (such as the Company's stock appreciation rights ("SARs") expense, IFRIC 21 and any gain or loss attributed to the sale or disposition of any asset or liability), non-recurring items (such as acquisition-related costs and debt settlement or other costs), and to include the distributions received from Morguard REIT and Morguard Residential REIT.

The presentation of the non-consolidated balance sheet does not classify short-term and long-term assets and liabilities. In addition, other assets as presented in the non-consolidated balance sheet group amounts receivable; prepaid expenses and other; and cash that are presented as a separate financial statement line in the Company's consolidated balance sheet, and loans payable and bank indebtedness that are presented as separate financial statement lines in the Company's consolidated balance sheet have been grouped as one single financial statement line in the non-consolidated balance sheet.

Non-GAAP financial measures that are calculated on a Non-Consolidated Basis are as follows. A reconciliation of the Non-Consolidated Basis inputs (discussed below) used in calculating the covenants from their most directly comparable IFRS financial measure are provided in the section "Part IV, Balance Sheet Analysis."

Non-Consolidated EBITDA

Non-consolidated EBITDA is defined as net income (loss) on a Non-Consolidated Basis before interest expense, income taxes, amortization, fair value adjustments to real estate properties, acquisition-related costs, debt settlement or other costs, any gain or loss attributed to the sale or disposition of any asset or liability, provision for impairment, other non-cash items and non-recurring items, plus the distributions received from Morguard REIT and Morguard Residential REIT. Non-consolidated EBITDA is presented in this MD&A because management considers this non-GAAP financial measure to be an important input to the Company's compliance measure on a Non-Consolidated Basis.

Non-Consolidated Interest Expense

Non-consolidated interest expense is defined as interest expense and interest capitalized to development properties on a Non-Consolidated Basis. Non-consolidated interest expense is presented in this MD&A because management considers this non-GAAP financial measure to be an important input to the Company's compliance measure on a Non-Consolidated Basis.

Non-Consolidated Indebtedness

Non-consolidated indebtedness (as defined in the Indenture) is a measure of the amount of debt financing utilized by the Company on a Non-Consolidated Basis. Indebtedness is presented in this MD&A because management considers this non-GAAP financial measure to be an important input to the Company's compliance measure on a Non-Consolidated Basis.

Non-Consolidated Aggregate Assets

Non-consolidated aggregate assets (as defined in the Indenture) is a measure of the value of the Company's assets on a Non-Consolidated Basis, adjusted to exclude goodwill and deferred income tax assets and to add back accumulated amortization of hotel properties. Non-consolidated aggregate assets is presented in this MD&A because management considers this non-GAAP financial measure to be an important input to the Company's compliance measure on a Non-Consolidated Basis.

Non-Consolidated Adjusted Shareholders' Equity

Non-consolidated adjusted shareholders' equity is defined as shareholders' equity computed on a Non-Consolidated Basis adjusted to exclude deferred tax assets and liabilities and to add back accumulated amortization of hotel properties. Non-consolidated adjusted shareholders' equity is presented in this MD&A because management considers this non-GAAP financial measure to be an important compliance measure and establishes a minimum requirement of equity of the Company.

NON-GAAP RATIOS

Non-GAAP ratios do not have any standardized meaning prescribed by IFRS and are not necessarily comparable to similar measures presented by other reporting issuers in similar or different industries. These measures should be considered as supplemental in nature and not as a substitute for related financial information prepared in accordance with IFRS. The Company's management uses these measures to aid in assessing the Company's underlying core performance and provides these additional measures so that investors may do the same. Management believes that the non-GAAP ratios described below, provide readers with a more comprehensive understanding of management's perspective on the Company's operating results and performance.

The following discussion describes the non-GAAP ratios the Company uses in evaluating its operating results.

NON-CONSOLIDATED INTEREST COVERAGE RATIO

Non-consolidated interest coverage ratio measures the amount of cash flow available to meet annual interest payments on the Company's indebtedness on a Non-Consolidated Basis and is defined as non-consolidated EBITDA divided by non-consolidated interest expense. Generally, the higher the interest coverage ratio, the lower the credit risk. Non-consolidated interest coverage ratio is presented in this MD&A because management considers this non-GAAP measure to be an important compliance measure of the Company's operating performance.

NON-CONSOLIDATED INDEBTEDNESS TO AGGREGATE ASSETS RATIO

Non-consolidated indebtedness to aggregate assets ratio is a compliance measure and establishes the limit for financial leverage of the Company on a Non-Consolidated Basis. Non-consolidated indebtedness to aggregate assets ratio is presented in this MD&A because management considers this non-GAAP measure to be an important compliance measure of the Company's financial position.

SUPPLEMENTARY FINANCIAL MEASURES

Supplementary financial measures represent a component of a financial statement line item (including ratios that are not non-GAAP ratios) that are presented in a more granular way outside the financial statements, calculated in accordance with the accounting policies used to prepare the line item presented in the financial statements.

The following discussion describes the supplementary financial measures the Company uses in evaluating its operating results:

TOTAL REVENUE

Total revenue is calculated as the sum of revenue from real estate properties, revenue from hotel properties, management and advisory fees and interest and other income and is presented in this MD&A because management considers this supplementary financial measure to be an important measure in evaluating the operating performance of the Company's income generating assets and services.

INDEBTEDNESS

Indebtedness is defined as the sum of the current and non-current portion of: (i) mortgages payable, (ii) Unsecured Debentures, (iii) convertible debentures, (iv) lease liabilities, (v) bank indebtedness, (vi) loans payable, and (vii) outstanding letters of credit. Indebtedness is a measure of the amount of debt financing utilized by the Company. Indebtedness is presented in this MD&A because management considers this supplementary financial measure to be an important measure of the Company's financial position.

INDEBTEDNESS TO TOTAL ASSETS RATIO

Indebtedness to total assets ratio is defined as indebtedness divided by total assets and is presented in this MD&A because management considers this supplementary financial measure to be an important measure of the Company's financial leverage.

CAPITAL MANAGEMENT MEASURES

The Company's capital management is designed to maintain a level of capital that allows it to implement its business strategy while complying with investment and debt restrictions, as well as existing debt covenants, while continuing to build long-term shareholder value and maintain sufficient capital contingencies.

The following discussion describes the Company's capital management measures.

LIQUIDITY

Liquidity is calculated as the sum of cash, amounts available under its revolving credit facilities and any committed net additional mortgage financing proceeds and is presented in this MD&A because management considers this capital management measure to be an important measure of the Company's financial position as well as determining the annual level of dividends to common shareholders.

PART II

BUSINESS OVERVIEW

Morguard Corporation is a real estate investment company whose principal activities include the acquisition, development and ownership of multi-suite residential, commercial and hotel properties. Morguard is also one of Canada's premier real estate investment advisors and management companies, representing major institutional and private investors. Morguard's total assets under management (including both owned and managed assets) were valued at \$18.6 billion as at June 30, 2023. The Company's common shares are publicly traded and listed on the Toronto Stock Exchange ("TSX") under the symbol "MRC." The Company's primary goal is to accumulate a portfolio of high-quality real estate assets and then deliver the benefits of such real estate ownership to shareholders.

MANAGEMENT AND ADVISORY SERVICES

The Company, through its wholly owned subsidiary, Morguard Investments Limited ("MIL"), provides real estate management services to Canadian institutional investors. Services include acquisitions, development, dispositions, leasing, performance measurement and asset and property management. For over 45 years, MIL has positioned itself as one of Canada's leading providers of real estate portfolio and asset and property management services. In addition, Morguard, through its 60% ownership interest in Lincluden Investment Management Limited ("Lincluden") offers institutional clients and private investors a broad range of global investment products across equity, fixed-income and balanced portfolios.

As of June 30, 2023, MIL together with Lincluden manage a portfolio (excluding Morguard's corporately owned assets and assets owned by Morguard REIT and Morguard Residential REIT) of assets having an estimated value of \$7.8 billion.

BUSINESS STRATEGY

Morguard's strategy is to acquire a diversified portfolio of commercial and multi-suite residential real estate assets both for its own accounts and for its institutional clients. The Company's cash flows are well diversified given the revenue stream earned from its management and advisory services platform, the Company's corporately owned assets and the distributions received from its investment in Morguard REIT and Morguard Residential REIT. Diversification of the portfolio, by both asset type and location, serves to reduce investment risk. The Company will divest itself of non-core assets when proceeds can be reinvested to improve returns. A primary element of the Company's business strategy is to generate stable and increasing cash flow and asset value by improving the performance of its real estate investment portfolio and by acquiring or developing real estate properties in sound economic markets.

The Company's business strategy consists of the following elements:

- Increase property values and cash flow through aggressive leasing of available space and of space becoming available;

- Take advantage of long-standing relationships with national and regional tenants;
- Target and execute redevelopment and expansion projects that will generate substantial returns;
- Pursue opportunities to acquire or develop strategically located properties;
- Minimize operating costs by utilizing internalized functions, including property and asset management, leasing, finance, accounting, legal and information technology services; and
- Dispose of properties where the cash flows and values have been maximized.

Morguard's strategically diversified asset portfolio and healthy, conservative debt ratios and financial resources provide strength against economic and real estate cycles. Morguard has always been driven by our commitment to real estate for the long term. Our experience has proven that this persistence has driven greater value for our shareholders year over year, and our diversified portfolio and conservative debt level position us well against any potential challenges. We will continue to carry on with this approach.

FUNDS FROM OPERATIONS

FFO (and FFO per common share) are non-GAAP financial measures that do not have any standardized meaning prescribed by IFRS and are not necessarily comparable to similar measures presented by other reporting issuers in similar or different industries. These measures should be considered as supplemental in nature and not as a substitute for related financial information prepared in accordance with IFRS. FFO is computed by the Company in accordance with the current definition of the Real Property Association of Canada ("REALPAC") and is widely used as a real estate industry standard that supplements net income and evaluates operating performance but is not indicative of funds available to meet the Company's cash requirements. Additional information on this non-GAAP financial measure can be found under the section "Part I, Specified Financial Measures."

The following table provides an analysis of the Company's FFO by component:

These measures should be considered as supplemental in nature and not as a substitute for related financial information prepared in accordance with IFRS. Normalized FFO is computed as FFO excluding non-recurring items on a net of tax basis and other fair value adjustments. The Company believes it is useful to provide an analysis of Normalized FFO which excludes non-recurring items on a net of tax basis and other fair value adjustments excluded from REALPAC's definition of FFO described above. Additional information on this non-GAAP financial measure can be found under the section "Part I, Specified Financial Measures."

- Acquisitions of \$112,980;
- Capitalization of property enhancements, including capital expenditures and tenant improvements totalling \$45,283;
- Development expenditures of \$9,896;
- A fair value gain on real estate properties of \$64,065;
- A decrease of \$93,501 due to the change in the U.S. dollar exchange rate; and

APPRAISAL CAPITALIZATION AND DISCOUNT RATES

The Company's internal valuation team consists of Appraisal Institute of Canada ("AIC") designated Accredited Appraiser Canadian Institute ("AACI") members who are qualified to offer valuation and consulting services and expertise for all types of real property, all of whom are knowledgeable and have recent experience in the fair value techniques for investment properties. AACI-designated members must adhere to AIC's Canadian Uniform Standards of Professional Appraisal Practice ("CUSPAP") and undertake ongoing professional development. The Company's appraisal division is responsible for determining the fair value of investment properties every quarter, which include co-owned properties and properties classified as equity-accounted investments. The Company's valuation processes and results are reviewed by the Company's senior management at least once every quarter, in line with the Company's quarterly reporting dates.

As at June 30, 2023, using the direct capitalization approach, the multi-suite residential, retail and office properties were valued using capitalization rates in the range of 3.3% to 10.0% (December 31, 2022 - 3.3% to 10.0%), resulting in an overall weighted average capitalization rate of 5.5% (December 31, 2022 - 5.5%).

The stabilized capitalization rates by product type are set out in the following table:

As at	June 30, 2023					December 31, 2022				
	Occupancy Rates		Capitalization Rates			Occupancy Rates		Capitalization Rates		
	Max.	Min.	Max.	Min.	Weighted Average	Max.	Min.	Max.	Min.	Weighted Average
Multi-suite residential	98.5%	92.0%	6.0%	3.3%	4.3%	98.5%	92.0%	6.0%	3.3%	4.3%
Retail	99.0%	85.0%	10.0%	5.0%	7.3%	99.0%	85.0%	10.0%	5.0%	7.2%
Office ⁽¹⁾	100.0%	85.0%	8.5%	4.0%	6.6%	100.0%	90.0%	8.3%	4.3%	6.7%

(1) Includes industrial properties comprising approximately 10% of the segment's total assets.

The key valuation metrics used in the discounted cash flow method for the retail and office properties are set out in the following table:

As at	June 30, 2023			December 31, 2022		
	Maximum	Minimum	Weighted Average	Maximum	Minimum	Weighted Average
Retail						
Discount rate	11.0%	5.8%	7.6%	11.0%	5.8%	7.5%
Terminal cap rate	10.0%	5.0%	6.6%	10.0%	5.0%	6.6%
Office						
Discount rate	9.0%	5.3%	6.6%	9.0%	5.3%	6.7%
Terminal cap rate	8.0%	4.3%	5.9%	8.0%	4.3%	5.9%

Fair values are most sensitive to changes in discount rates, capitalization rates and stabilized or forecast net operating income. Generally, an increase in stabilized net operating income will result in an increase in the fair value of the income producing properties, and an increase in capitalization rates will result in a decrease in the fair value of the properties. The capitalization rate magnifies the effect of a change in stabilized net operating income, with a lower capitalization rate resulting in a greater impact on the fair value of the property than a higher capitalization rate.

The sensitivity of the fair values of the Company's income producing properties as at June 30, 2023, and December 31, 2022, is set out in the table below:

As at	June 30, 2023		December 31, 2022	
Change in capitalization rate:	0.25%	(0.25%)	0.25%	(0.25%)

The presentation of Non-Consolidated Basis measures represents a non-GAAP financial measure and is presented in this MD&A because management considers these non-GAAP financial measures to be an important measure to evaluate and monitor the Company's compliance with its Indenture.

The covenants that govern the Unsecured Debentures are calculated using the Company's published results prepared in accordance with IFRS adjusted as required to account for the Company's Public Entity Investments using the equity method of accounting and other adjustments defined by the Indenture. The presentation of the Non-Consolidated balance sheet does not classify short-term and long-term assets and liabilities. In addition, other assets as presented in the Non-Consolidated balance sheet group the following items that are presented as a separate financial statement line in the Company's consolidated balance sheet: amounts receivable; prepaid expenses and other; and cash.

The Company must maintain an interest coverage ratio computed on a Non-Consolidated Basis above 1.65 times, an indebtedness to aggregate assets ratio computed on a Non-Consolidated Basis not to exceed 65% and a minimum equity requirement computed on a Non-Consolidated Basis of at least \$300,000. If the Company does not meet these covenants, the Unsecured Debentures will become immediately due and payable unless the Company is able to remedy the default or obtain a waiver from lenders.

Non-Consolidated Basis adjustments include the following:

- An adjustment (as defined in the Indenture) to account for the Company's Public Entity Investments using the equity method of accounting ("Equity Adjustment"). The adjustment requires the Public Entity Investments which are consolidated under IFRS to each respective financial statement line presented within the balance sheet and statement of income to be presented on a single line within equity-accounted investments;
- An adjustment (as defined in the Indenture) to the balance sheet to exclude deferred tax assets and liabilities, goodwill and to add back accumulated amortization of hotel properties ("Balance Sheet Indenture Adjustment"); and
- An adjustment (as defined in the Indenture) to the statement of income to exclude other non-cash items (such as the Company's SARs expense, IFRIC 21 and any gain or loss attributed to the sale or disposition of any asset or liability), non-recurring items (such as acquisition-related costs and debt settlement or other costs), and to include the distributions received from Morguard REIT and Morguard Residential REIT ("Income Statement Indenture Adjustment").

The covenants computed on a Non-Consolidated Basis are as follows:

Non-Consolidated Basis	Covenant Requirements	June 30, 2023	June 30, 2022
Interest coverage ratio ⁽¹⁾⁽²⁾		1.65	2.29
Indebtedness to aggregate assets ratio ⁽²⁾	Less than or equal to 65%	44.1%	43.5%
Adjusted shareholders' equity ⁽²⁾	Not less than \$300,000	\$3,558,733	\$3,900,000

(1) Calculated on a trailing twelve-month basis.

(2) Represents a non-GAAP financial measure/ratio that does not have any standardized meaning prescribed by IFRS and is not necessarily comparable to similar measures presented by other reporting issuers in similar or different industries. This measure should be considered as supplemental in nature and not as a substitute for related financial information prepared in accordance with IFRS. Additional information on this non-GAAP financial measure/ratio can be found under the section Part I, "Specified Financial Measures."

PART V

LIQUIDITY

Morguard uses a combination of existing cash, cash generated from operations, mortgages, bank indebtedness, project-specific financing and equity to finance its activities. For the three and six months ended June 30, 2023, Morguard received \$7,603 and \$15,273, respectively, in recurring distributions and dividends from subsidiaries and affiliated entities.

The Company has liquidity of approximately \$318,000 comprised of \$162,000 in cash, \$125,000 available under its revolving credit facilities and \$31,000 of additional net mortgage financing proceeds under commitment. In addition, the Company has approximately \$1,320,000 of unencumbered income producing and hotel properties, and other investments which could be utilized for financing.

The Company has approximately \$1,176,000 of mortgages payable maturing during 2023 and 2024 having an aggregate loan-to-value ratio of 52% which management expects to be able to refinance at similar or favourable terms. In addition, the Company has \$175,000, \$225,000 and \$225,000 of senior unsecured debentures maturing in September 2023, January 2024 and November 2024, respectively. The Company expects to be able to issue new debt instruments and use current liquidity to permit the repayment of 2023 and 2024 maturities.

Net cash flows provided by operating activities represent the primary source of liquidity to fund dividends and maintenance capital expenditures (excluding new acquisition and development spending) on the Company's real estate properties. The Company's net cash flows provided by operating activities are dependent upon the occupancy level of its rental properties, rental rates on its leases, collectibility of rent from its tenants, level of operating expenses and other factors. Accordingly, the Company does not repay maturing debt from cash flow but rather with proceeds from refinancing such debt or financing unencumbered properties. Material changes in these factors may adversely affect the Company's cash flows provided by operating activities and liquidity.

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES AND ESTIMATES

The Company's unaudited condensed consolidated financial statements for the three and six months ended June 30, 2023 and 2022, have been prepared in accordance with IAS 34, Interim Financial Reporting, as issued by the IASB. The condensed consolidated financial statements use the same accounting policies and methods of their application as the most recent annual audited consolidated financial statements and accompanying notes for the year ended December 31, 2022, which include the significant accounting policies most affected by estimates and judgements, and should be read in conjunction with the most recent annual audited consolidated financial statements.

The MD&A for the year ended December 31, 2022, contains a discussion of the significant accounting policies most affected by estimates and judgments used in the preparation of the consolidated financial statements, being the accounting policies relating to *de facto* control, estimates of fair value of real estate properties, estimating deferred tax assets and liabilities, revenue recognition, valuation of financial instruments and the determination of whether an acquisition represents a business combination or an asset acquisition. Management determined that as at June 30, 2023, there is no change to the assessment of the significant accounting policies most affected by estimates and judgments as detailed in the MD&A for the year ended December 31, 2022.

FINANCIAL INSTRUMENTS

The following describes the Company's recognized and unrecognized financial instruments.

The Company's financial assets and financial liabilities comprise cash, restricted cash, amounts receivable, finance lease receivable, accounts payable and accrued liabilities, bank indebtedness, mortgages payable, loans payable, lease liabilities, Unsecured Debentures and convertible debentures (excluding any conversion option).

Financial assets must be classified and measured on the basis of both the business model in which the assets are managed and the contractual cash flow characteristics of the asset. Financial assets subsequent to initial recognition are classified and measured based on three categories: amortized cost, fair value through other comprehensive income ("FVTOCI") and fair value through profit and loss ("FVTPL"). Financial liabilities are classified and measured based on two categories: amortized cost and FVTPL. Fair values of financial assets and financial liabilities are presented as follows:

Fair Value of Financial Assets and Financial Liabilities

The fair values of cash, restricted cash, amounts receivable, accounts payable and accrued liabilities and bank indebtedness approximate their carrying values due to the short-term maturity of those instruments. The loans payable are reflected at fair value since they are based on a floating interest rate and reflect the terms of current market conditions.

Mortgages payable, Unsecured Debentures, convertible debentures, lease liabilities and finance lease receivable are carried at amortized cost using the effective interest method of amortization. The estimated fair values of long-term borrowings have been determined based on market information, where available, or by discounting future payments of interest and principal at estimated interest rates expected to be available to the Company.

The fair value of the mortgages payable has been determined by discounting the cash flows of these financial obligations using June 30, 2023 market rates for debts of similar terms. Based on these assumptions, the fair value as at June 30, 2023 of the mortgages payable before deferred financing costs and mark-to-market adjustments is estimated at \$4,337,935 (December 31, 2022 - \$4,370,416), compared with the carrying value of \$4,633,271 (December 31, 2022 - \$4,663,814). The fair value of the mortgages payable varies from the carrying value due to fluctuations in interest rates since their issue.

The fair value of the Unsecured Debentures liability is based on its closing bid price. As at June 30, 2023, the fair value of the Unsecured Debentures has been estimated at \$605,837 (December 31, 2022 - \$601,040), compared with the carrying value of \$625,000 (December 31, 2022 - \$625,000).

The fair value of the convertible debentures liability is based on their market trading prices. As at June 30, 2023, the fair value of the convertible debentures before deferred financing costs has been estimated at \$141,174 (December 31, 2022 - \$172,176), compared with the carrying value of \$150,000 (December 31, 2022 - \$179,500).

The fair value of the finance lease receivable is determined by discounting the cash flows of the financial receivable using June 30, 2023 market rates for debt on similar terms. Based on these assumptions, as at June 30, 2023, the fair value of the finance lease receivable has been estimated at \$58,597 (December 31, 2022 - \$58,331).

RISKS AND UNCERTAINTIES

All investment properties are subject to a degree of risk and uncertainty. Income from real estate assets is affected by various factors, including general economic conditions and local market circumstances. Local business conditions such as oversupply of space or a reduction in demand particularly affect income property investments. The major categories of risk the Company encounters in conducting its business and some of the actions it takes to mitigate these risks are outlined in the Company's MD&A for the year ended December 31, 2022 and the Company's most recent Annual Information Form, dated February 23, 2023 and provide a more detailed discussion of these and other risks.

CONTROLS AND PROCEDURES CONCERNING FINANCIAL INFORMATION

The financial certification process project team has documented and assessed the design of the internal controls in order to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with IFRS. This undertaking has enabled the Chief Executive Officer and Chief Financial Officer to attest that the design of the internal controls with regard to financial information are effective using the Committee of Sponsoring Organizations of the Treadway Commission (COSO) Internal Control - Integrated Framework (2013). In order to ensure that the consolidated financial statements and MD&A present fairly, in all material respects, the financial position of the Company and the results of its operations, management is responsible for establishing and maintaining disclosure controls and procedures, as well as internal control over financial reporting.

The Company's management has evaluated the effectiveness of the Company's disclosure controls and procedures and, based on such evaluation, has concluded that their design is adequate and effective as of and for the six months ended June 30, 2023. The Company's management has also evaluated the effectiveness of the internal controls over financial reporting and has concluded that their design is effective as of and for the six months ended June 30, 2023.

An information disclosure policy constitutes the framework for the information disclosure process with regard to the annual and interim filings, as well as to other reports filed or submitted under securities legislation. This policy aims in particular at identifying material information and validating the related reporting. The Disclosure Committee, established in 2005, is responsible for ensuring compliance with this policy. Senior management acts as the Disclosure Committee, ensuring compliance with this policy and reviewing main documents to be filed with regulatory authorities to ensure that all significant information regarding operations is communicated in a timely manner.

SUMMARY OF QUARTERLY RESULTS

A significant portion of the Company's real estate properties are located in the United States. As a result, the Company is exposed to foreign currency exchange rate fluctuations with respect to its quarterly results derived from its properties located in the U.S.

Quarterly results fluctuate due to acquisitions and dispositions, the impact of foreign exchange rate fluctuations and new mortgage financing as well as mortgage refinancing. In addition, net income includes a number of non-cash components, such as fair value gain/loss on Morguard Residential REIT units, fair value gain/loss on real estate properties, fair value gain/loss on investments in marketable securities and other fund investments, an IFRIC 21 adjustment to realty taxes, equity income (loss) from investment, provision for impairment and deferred taxes.

The Company's significant real estate property transactions for the previous eight quarters are as follows:

Year	Quarter	Asset Class	Transaction	Sq. feet	# of rooms/suites
2023	First	Residential	Acquisition	—	240
2023	First	Industrial	Disposition	19,875	—
2022	Fourth	Office ⁽¹⁾	Acquisition	109,208	—
2022	Fourth	Industrial	Disposition	21,536	—
2022	Fourth	Multi-suite residential	Disposition	—	340
2022	Fourth	Hotels	Disposition	—	616

2021	Fourth	Hotels	Disposition	—	80
2021	Third	Hotels	Disposition	—	379
2021	Third	Retail	Disposition	46,500	—

(1) The Company acquired a 50% interest in the property, total square feet is stated at 100% basis.

(2) The Company acquired the remaining 40.9% interest in a mixed-use property comprising 299 residential suites and 52,000 square feet of commercial space.

Revenue and Net Operating Income

The regional distribution of the Company's properties serves to add stability to the Company's cash flows because it reduces the Company's vulnerability to economic fluctuations affecting any particular region. In addition, the Company's tenant mix is diversified therefore limiting its exposure to any one tenant.

The Company has seen steady revenue growth during the last eight quarters. In addition, lower hotel revenue during the first quarter of 2022 and 2023 is seasonally impacted by the colder months. The change in foreign exchange rates and the impact of acquisition net of disposal of properties (described above) also contributed to the fluctuation in revenue during the last eight quarters.

Similar to the reasons described above, NOI over the last eight quarters has followed a similar pattern from an increase in revenue and the Company's ability to control expenses as a percentage of revenue. The impact of foreign exchange rates and of acquisitions and dispositions also factor into the variance from quarter to quarter. The first quarter results (three months ended March 31) are impacted by IFRIC 21, whereby the Company records the entire annual realty tax expense for its U.S. properties on January 1, except for U.S. properties acquired during the year in which the realty taxes are not recorded in the year of acquisition. As a result, the second, third and fourth quarters typically have no realty tax expense which results in higher NOI and NOI margins. Adjusted NOI which excludes IFRIC 21 is presented in the table above to illustrate a more comparable quarter-to-quarter analysis.

Net Income (Loss) Attributable to Common Shareholders

Taking into account the above factors for revenue and NOI variations, the change in net income (loss) resulted from the following non-cash components:

- The Company valued the Morguard Residential REIT units (presented as a liability under IFRS) based on the closing price of the TSX-listed units, resulting in a fair value gain/loss on MRG units recorded to net income (loss);
- The Company recorded a fair value gain on real estate properties for the six months ended June 30, 2023, mainly due to an increase in stabilized NOI across the Company's Canadian and U.S. residential portfolio. The Company recorded a fair value loss during the year ended December 31, 2022, primarily due to an increase in capitalization rates at the Company's retail and office properties;
- During the six months ended June 30, 2023 and 2022, the Company recorded a deferred tax expense coinciding with the fair value gains recorded on the Company's real estate properties; and
- The Company recorded an impairment provision on hotel properties of \$17,233 during the third quarter of 2021.

Capitalization Rates

As at June 30, 2023, and December 31, 2022, the Company had its portfolio internally appraised. In addition, the Company’s U.S. portfolio is appraised by independent U.S. real estate appraisal firms on a three-year cycle.

The Company determined the fair value of each income producing property based upon, among other things, rental income from current leases and assumptions about rental income from future leases reflecting market conditions at the applicable consolidated balance sheet dates, less future cash outflow pertaining to the respective leases. The Company’s multi-suite residential properties are appraised using the direct capitalization of income method. The retail, office and industrial properties are appraised using a number of approaches that typically include a discounted cash flow analysis, a direct capitalization of income method and a direct comparison approach. The discounted cash flow analysis is primarily based on discounting the expected future cash flows, generally over a term of 10 years, including a terminal value based on the application of a capitalization rate to estimated year-11 cash flows.

As at June 30, 2023, using the direct capitalization approach, the multi-suite residential, retail and office properties were valued using capitalization rates in the range of 3.3% to 10.0% (December 31, 2022 - 3.3% to 10.0%), resulting in an overall weighted average capitalization rate of 5.5% (December 31, 2022 - 5.5%).

The stabilized capitalization rates by asset type are set out in the following table:

As at	June 30, 2023					December 31, 2022				
	Occupancy Rates		Capitalization Rates			Occupancy Rates		Capitalization Rates		
	Max.	Min.	Max.	Min.	Weighted Average	Max.	Min.	Max.	Min.	Weighted Average
Multi-suite residential	98.5%	92.0%	6.0%	3.3%	4.3%	98.5%	92.0%	6.0%	3.3%	4.3%
Retail	99.0%	85.0%	10.0%	5.0%	7.3%	99.0%	85.0%	10.0%	5.0%	7.2%
Office ⁽¹⁾	100.0%	85.0%	8.5%	4.0%	6.6%	100.0%	90.0%	8.3%	4.3%	6.7%

⁽¹⁾ Includes industrial properties comprising approximately 10% of the segment's total assets.

The key valuation metrics used in the discounted cash flow method for the retail and office properties are set out in the following table:

As at	June 30, 2023			December 31, 2022		
	Maximum	Minimum	Weighted Average	Maximum	Minimum	Weighted Average
Retail						
Discount rate	11.0%	5.8%	7.6%	11.0%	5.8%	7.5%
Terminal cap rate	10.0%	5.0%	6.6%	10.0%	5.0%	6.6%
Office						
Discount rate	9.0%	5.3%	6.6%	9.0%	5.3%	6.7%
Terminal cap rate	8.0%	4.3%	5.9%	8.0%	4.3%	5.9%

Fair values are most sensitive to changes in discount rates, capitalization rates and stabilized or forecast net operating income. Generally, an increase in stabilized net operating income will result in an increase in the fair value of the income producing properties, and an increase in capitalization rates will result in a decrease in the fair value of the properties. The capitalization rate magnifies the effect of a change in stabilized net operating income, with a lower capitalization rate resulting in a greater impact on the fair value of the property than a higher capitalization rate. If the weighted average stabilized capitalization rates were to increase or decrease by 25 basis points (assuming no change in stabilized net operating income), the value of the income producing properties as at June 30, 2023 would decrease by \$467,439 and increase by \$516,930, respectively.

The sensitivity of the fair values of the Company's income producing properties as at June 30, 2023, and December 31, 2022, is set out in the table below:

As at	June 30, 2023		December 31, 2022	
Change in capitalization rate:	0.25%	(0.25%)	0.25%	(0.25%)

CONTINGENCIES

The Company is contingently liable with respect to litigation, claims and environmental matters that arise from time to time, including those that could result in mandatory damages or other relief, which could result in significant expenditures. While the final outcome of these matters cannot be predicted with certainty, in the opinion of management, any uninsured liability that may arise from such contingencies would not have a material adverse effect on the financial position or results of operations of the Company. Any settlement of claims in excess of amounts recorded will be charged to operations as and when such determination is made.

NOTE 25

The Company monitors its capital structure based on an interest coverage ratio and a debt to gross book value ratio. These ratios are used by the Company to manage an acceptable level of leverage and are calculated in accordance with the terms of the specific agreements with creditors and are not considered measures in accordance with IFRS, nor is there an equivalent IFRS measure.

The Company's Unsecured Debentures contain covenants that are calculated on a non-consolidated basis, which represents the Company's consolidated results prepared in accordance with IFRS as shown on the Company's most recently published annual audited consolidated financial statements, adjusted, as required, to account for the Company's public entity investments in Morguard Residential REIT and Morguard REIT using the equity method. The covenants that the Company must maintain are a non-consolidated interest coverage ratio above 1.65 times, a non-consolidated debt to gross book value ratio not to exceed 65% and a minimum non-consolidated equity requirement of at least \$300,000. If the Company does not meet these covenants, the Unsecured Debentures will become immediately due and payable unless the Company is able to remedy the default or obtain a waiver from debenture holders. The Company is in compliance with all Unsecured Debenture covenants.

NOTE 26

FINANCIAL INSTRUMENTS AND RISK MANAGEMENT

Refer to the Company's annual audited consolidated financial statements as at and for the year ended December 31, 2022 for an explanation of the Company's risk management policy as it relates to financial instruments.

Fair Value of Financial Assets and Financial Liabilities

The fair values of cash, restricted cash, amounts receivable, accounts payable and accrued liabilities and bank indebtedness approximate their carrying values due to the short-term maturity of those instruments. The fair values of mortgages and loans receivable are based on the current market conditions for financing loans with similar terms and risks. The loans payable are reflected at fair value since they are based on a floating interest rate and reflect the terms of current market conditions.

Mortgages payable, Unsecured Debentures, convertible debentures, lease liabilities and finance lease receivable are carried at amortized cost using the effective interest rate method of amortization. The estimated fair values of long-

term borrowings have been determined based on market information, where available, or by discounting future payments of interest and principal at estimated interest rates expected to be available to the Company.

The fair value of the mortgages payable has been determined by discounting the cash flows of these financial obligations using June 30, 2023 market rates for debts of similar terms (Level 2). Based on these assumptions, the fair value as at June 30, 2023 of the mortgages payable before deferred financing costs and mark-to-market adjustments is estimated at \$4,337,935 (December 31, 2022 - \$4,370,416), compared with the carrying value of \$4,633,271 (December 31, 2022 - \$4,663,814). The fair value of the mortgages payable varies from the carrying value due to fluctuations in interest rates since their issue.

The fair value of the Unsecured Debentures liability is based on its closing bid price (Level 1). As at June 30, 2023, the fair value of the Unsecured Debentures has been estimated at \$605,837 (December 31, 2022 - \$601,040), compared with the carrying value of \$625,000 (December 31, 2022 - \$625,000).

The fair value of the convertible debentures liability is based on their market trading prices (Level 1). As at June 30, 2023, the fair value of the convertible debentures before deferred financing costs has been estimated at \$141,174 (December 31, 2022 - \$172,176), compared with the carrying value of \$150,000 (December 31, 2022 - \$179,500).

The fair value of the finance lease receivable is determined by discounting the cash flows of the finance lease receivable using June 30, 2023 market rates for debt on similar terms (Level 3). Based on these assumptions, as at June 30, 2023, the fair value of the finance lease receivable has been estimated at \$58,597 (December 31, 2022 - \$58,331).

The fair value hierarchy of financial instruments and real estate properties measured at fair value in the consolidated balance sheets is as follows:
