#### STATEMENT OF COMPLIANCE AND MATERIAL ACCOUNTING POLICIES

These condensed consolidated financial statements have been prepared in accordance with International Accounting Standards 34, "Interim Financial Reporting", as issued by the International Accounting Standards Board, and thus do not contain all of the disclosures applicable to the annual audited consolidated financial statements.

These condensed consolidated financial statements use the same accounting policies and methods of their application as the most recent annual audited consolidated financial statements and should be read in conjunction with the most recent annual audited consolidated financial statements.

The condensed consolidated financial statements were approved and authorized for issue by the Trustees on April 29, 2026.

Significant assumptions are used in the assessment of fair value, including estimates of future operating cash flows, the time period over which they will occur, appropriate discount and capitalization rates and stabilized net operating income (which is primarily influenced by revenue growth, vacancy rates, inflation rates and operating costs). These assumptions could change periodically and ultimately impact the underlying valuation of the Trust's real estate properties and equity-accounted investment.

#### APPRAISAL CAPITALIZATION AND DISCOUNT RATES

Morguard's subsidiary has a valuation team that consists of Appraisal Institute of Canada ("AIC") designated Accredited Appraiser Canadian Institute ("AACI") members who are qualified to offer valuation and consulting services and expertise for all types of real property, all of whom are knowledgeable and have recent experience in the fair value techniques for investment properties. AACI-designated members must adhere to AIC's Canadian Uniform Standards of Professional Appraisal Practice and undertake ongoing professional development. Morguard's appraisal division is responsible for determining the fair value of investment properties every quarter. The team reports to a senior executive, and the internal valuation team's valuation processes and results are reviewed by senior management at least once every quarter, in line with the Trust's quarterly reporting dates.

Generally, the Trust's real estate properties are appraised using a number of approaches, depending on the asset, that would typically include a discounted cash flow analysis, a direct capitalization approach and a direct comparison approach.

The primary method of valuation used by the Trust is discounted cash flow analysis. This approach involves determining the fair value of each income producing property based on, among other things, rental income from current leases and assumptions about rental income from future leases reflecting market conditions at the applicable balance sheet dates, less future cash outflows pertaining to the respective leases. Fair values are primarily determined by discounting the expected future cash flows, generally over a term of 10 years and include a terminal value based on the application of a capitalization rate to estimated year 11 net operating income. Discount and capitalization rates are estimated using market surveys, available appraisals and market comparables.

The direct comparison approach compares a subject property's characteristics with those of comparable properties that have recently been sold. The Trust has a retail property in British Columbia where the highest and best use is a redevelopment to mixed residential and commercial use. Since the value of the property is in the underlying land with minimal holding income, it has been valued using the direct comparison approach.

Under the direct capitalization approach, capitalization rates are applied to the estimated stabilized net operating income of the properties. Estimated stabilized net operating income is based on projected rental revenue and property operating costs adjusted for such items as vacancy loss. The direct capitalization approach is typically used to corroborate the discounted cash flow analysis.

The stabilized capitalization rates in the following table exclude the property valued using the comparable sales method, as well as one property with expected variable income that did not have its discounted cash flow analysis corroborated using the direct capitalization approach.

Using the direct capitalization income approach to corroborate the discounted cash flow method, the properties were valued using capitalization rates in the range of 5.0% to 9.5% applied to a stabilized net operating income (December 31, 2025 – 5.0% to 10.0%), resulting in an overall weighted average capitalization rate of 7.56% (December 31, 2025 – 7.58%).

The stabilized capitalization rates by business segments are set out in the following table:

	March 31, 2026					December 31, 2025				
	Stabilized Occupancy		Capitalization Rates			Stabilized Occupancy		Capitalization Rates		
	Max.	Min.	Max.	Min.	Weighted Average	Max.	Min.	Max.	Min.	Weighted Average
Retail	97.0%	90.0%	8.0%	5.0%	7.7%	97.0%	90.0%	8.0%	5.0%	7.6%
Office	100.0%	85.0%	9.5%	5.3%	7.6%	100.0%	85.0%	10.0%	5.3%	7.8%
Industrial	100.0%	95.0%	5.5%	5.3%	5.5%	100.0%	95.0%	5.5%	5.3%	5.4%

The table below provides further details of the discount rates and terminal cap rates used in the discounted cash flow method by business segments:

	March 31, 2026			December 31, 2025		
	Maximum	Minimum	Weighted Average	Maximum	Minimum	Weighted Average
<b>RETAIL</b>						
Discount rate	9.0%	5.8%	7.7%	9.0%	5.8%	7.7%
Terminal cap rate	8.0%	5.3%	6.9%	8.0%	5.3%	6.9%
<b>OFFICE</b>						
Discount rate	10.0%	6.3%	7.6%	10.0%	6.3%	7.6%
Terminal cap rate	9.3%	5.3%	6.7%	9.3%	5.3%	6.7%
<b>INDUSTRIAL</b>						
Discount rate	6.5%	6.0%	6.2%	6.5%	6.0%	6.2%
Terminal cap rate	5.8%	5.5%	5.5%	5.8%	5.5%	5.5%

Fair values are most sensitive to changes in discount rates, capitalization rates and stabilized or forecast net operating income. Generally, an increase in net operating income will result in an increase in the fair value of the income producing properties, and an increase in capitalization rates will result in a decrease in the fair value of the properties. The capitalization rate magnifies the effect of a change in net operating income, with a lower capitalization rate resulting in a greater impact to the fair value of the property than a higher capitalization rate. If the weighted average stabilized capitalization rate were to increase or decrease by 25 basis points, the value of the income producing properties as at March 31, 2026, would decrease by \$62,684 or increase by \$67,011, respectively.

The sensitivity of the fair values of the Trust's income producing properties is set out in the table below:

**As at March 31, 2026**

Change in capitalization rate	0.25%	(0.25%)
Retail	(\$34,725)	\$37,069
Office	(24,815)	26,496
Industrial	(3,144)	3,446
	(\$62,684)	\$67,011

On July 2, 2024, the Trust completed an interest rate swap with a notional amount of \$75,000 whereby the Trust pays a fixed rate of interest of 5.82% and receives interest at a variable rate equal to the Canadian Overnight Repo Rate Average plus 2.15% on the notional amount. The Trust designated this interest rate swap as a cash flow hedge and applied hedge accounting. The objective of the interest rate swap is to eliminate the variability of cash flows on the variable-rate mortgage stemming from fluctuations in market interest rates.

As at March 31, 2026, the derivative liability was \$1,516 (December 31, 2025 – \$2,005). The maturity date of the interest rate swap coincides with the mortgage payable maturity on June 3, 2029.

### CONVERTIBLE DEBENTURES

#### Debentures

On December 7, 2021, the Trust issued \$159,000 principal amount of 5.25% convertible unsecured subordinated debentures ("Convertible Debentures") maturing on December 31, 2026 (the "Maturity Date"). As at March 31, 2026, Morguard held a total of \$60,000 principal amount of the Convertible Debentures (December 31, 2025 – \$60,000).

Interest is payable semi-annually, not in advance, on June 30 and December 31 of each year.

The Convertible Debentures, with the exception of the value assigned to the holders' conversion option, have been recorded as debt on the balance sheets. The following table summarizes the allocation of the principal amount and related issue costs of the Convertible Debentures at the date of original issue. The portion of issue costs attributable to the liability of \$4,026 was capitalized and will be amortized over the term to maturity, while the remaining amount of \$187 was charged to equity.

	Liability	Equity	Principal Amount Issued
Transaction date – December 7, 2021	\$151,934	\$7,066	\$159,000
Issue costs	(4,026)	(187)	(4,213)
	<b>\$147,908</b>	<b>\$6,879</b>	<b>\$154,787</b>

Each Convertible Debenture is convertible into freely tradable units of the Trust at the option of the holder, exercisable at any time prior to the close of business on the last business day preceding the Maturity Date at a conversion price of \$7.80 per unit, being a rate of approximately 128.2 units per thousand principal amount of Convertible Debentures, subject to adjustment.

The Convertible Debentures payable consist of the following:

As at	March 31, 2026	December 31, 2025
Convertible debentures – liability	<b>\$151,934</b>	\$151,934
Convertible debentures – accretion	<b>5,860</b>	5,455

Issue costs	<b>(689)</b>	(919)
<b>Convertible debentures</b>	<b>\$157,105</b>	\$156,470

Remaining interest and principal payments on the Convertible Debentures are as follows:

	Interest	Principal	Total
2026	\$8,348	\$159,000	\$167,348

### Redemption Rights

From January 1, 2026, to the close of business on December 31, 2026, the Convertible Debentures are redeemable, in whole or in part, at par plus accrued and unpaid interest at the Trust's sole option.

### Payment Upon Redemption or Maturity

As part of the above redemption options, or at maturity, the Trust may satisfy its obligation to repay the principal amounts of the Convertible Debentures, in whole or in part, by delivering units of the Trust. In the event that the Trust elects to satisfy its obligation to repay principal with units of the Trust, the number of units issued is obtained by dividing the principal amount of the Convertible Debentures by 95% of the weighted average trading price of the units on the TSX for the 20 consecutive trading days ending five trading days prior to the date fixed for redemption or the Maturity Date, as applicable.

### Interest Payment Election

The Trust may elect, subject to applicable regulatory approval, to issue and deliver units of the Trust to the Debenture Trustee in order to raise funds to pay interest on the Convertible Debentures, in which event the holders of the Convertible Debentures will be entitled to receive a cash payment equal to the interest payable from the proceeds of the sale of such units.

One of these lines is subject to cash flow tests based on the operating results of the secured properties along with prevailing bond yields. As at March 31, 2026, there is a maximum of \$101,230 available (December 31, 2025 – \$99,430).

As at March 31, 2026, the Trust had borrowed \$93,243 (December 31, 2025 – \$87,973) on its credit facilities and issued letters of credit in the amount of \$516 (December 31, 2025 – \$516) related to these facilities. *RELATED PARTY TRANSACTIONS*

Related party transactions are summarized as follows:

*(a) Agreement with Morguard Investments Limited*

Under the property management agreement, the Trust pays MIL fees for property management services, capital expenditure administration, information system support activities and risk management administration. Property management fees average approximately 3.3% of gross revenue from the income producing properties owned by the Trust. The management agreement is renewed annually to ensure fees paid reflect fair value for the services provided. Under the leasing services arrangement, the Trust may, at its option, use MIL for leasing services. Leasing fees range from 2% to 6% of the total minimum rent of new leases. Fees for the renewal of a lease are half of the fees for a new lease. Leasing services include lease documentation.

The Trust has employed the services of MIL for both the acquisition and disposition of properties on a case-by-case basis. Fees are generally based on the sale price of the properties and are capitalized in the case of an asset acquisition. MIL is a tenant at three of the Trust's properties. The Trust has employed the services of MIL for the appraisal of its real estate properties as required for IFRS reporting purposes. Fees are generally based on the size and complexity of each property and are expensed as part of the Trust's professional and compliance fees.

During the period, the Trust incurred/(earned) the following:

<b>For the three months ended March 31,</b>	<b>2026</b>	<b>2025</b>

## NOTE 15

### UNITHOLDERS' EQUITY

#### (a) Units Outstanding

The Trust is authorized to issue an unlimited number of units. These units have no par value. The following table summarizes the changes in units from January 1, 2025 to March 31, 2026:

	Three months ended March 31, 2026	Year ended December 31, 2025
Balance, beginning of period	66,433,117	64,292,073
Distribution Reinvestment Plan – Morguard	282,768	1,839,750
Distribution Reinvestment Plan – other unitholders	59,682	301,294
<b>Balance, end of period</b>	<b>66,775,567</b>	<b>66,433,117</b>

Total distributions recorded during the three months ended March 31, 2026, amounted to \$3,997 or \$0.06 per unit (2025 – \$3,864 or \$0.06 per unit). On March 16, 2026, the Trust declared a distribution in the amount of \$0.02 per unit for the month of March 2026, payable on April 15, 2026.

#### (b) Normal Course Issuer Bid

On February 4, 2026, the Trust announced that the TSX had accepted notice filed by the Trust of its intention to make a normal course issuer bid. The notice provided that during the 12-month period commencing February 9, 2026, and ending February 8, 2027, the Trust may purchase for cancellation on the TSX up to 3,321,655 units in total, being approximately 5% of the outstanding units. Additionally, the Trust may purchase for cancellation up to \$9,800 principal amount of the Convertible Debentures due on the Maturity Date, being 10% of the public float of outstanding Convertible Debentures. The price that the Trust would pay for any such units or debentures would be the market price at the time of acquisition.

During the three months ended March 31, 2026, and 2025, the Trust did not purchase any units or debentures for cancellation.

#### (c) Distribution Reinvestment Plan

Under the Trust's DRIP, unitholders can elect to reinvest cash distributions into additional units at a weighted average trading price of the units on the TSX for the 20 trading days immediately preceding the applicable date of distribution. During the three months ended March 31, 2026, the Trust issued 342,450 units under the DRIP (2025 – 318,562 units).

*(d) Net Income/(Loss) Per Unit*

The following table sets forth the computation of basic and diluted net income/(loss) per unit:

<b>For the three months ended March 31,</b>	<b>2026</b>	<b>2025</b>
Net income/(loss) – basic	<b>\$6,036</b>	(\$11,665)
Net income/(loss) – diluted	<b>\$6,036</b>	(\$11,665)
Weighted average number of units outstanding – basic	<b>66,552</b>	64,403
Weighted average number of units outstanding – diluted	<b>66,552</b>	64,403
Net income/(loss) per unit – basic	<b>\$0.09</b>	(\$0.18)
Net income/(loss) per unit – diluted	<b>\$0.09</b>	(\$0.18)

To calculate net income/(loss) – diluted, interest, accretion and the amortization of financing costs on Convertible Debentures outstanding that were expensed during the period are added back to net income/(loss) – basic. The weighted average number of units outstanding – diluted is calculated as if all Convertible Debentures outstanding as at March 31, 2026, and 2025, had been converted into units of the Trust at the beginning of the year. The calculation of net income/(loss) per unit – diluted excludes the impact of the Convertible Debentures for the three months ended March 31, 2026, and 2025, as their inclusion would be anti-dilutive.

*COMMITMENTS AND CONTINGENCIES*

*(a) Commitments*

The Trust has entered into various agreements relating to capital expenditures for its properties. These expenditures include development of new space, redevelopment or retrofit of existing space, and other capital expenditures. Should all conditions be met, as at March 31, 2026, committed capital expenditures in the next 12 months are estimated at \$5,092.

The Trust has various other contractual obligations in the normal course of operations. These contracts can generally be cancelled with 30 days' notice.

*(b) Contingencies*

The Trust is liable contingently with respect to litigation, claims and environmental matters that arise from time to time, including those that could result in mandatory damages or other relief, which could result in significant expenditures. While the outcome of these matters cannot be predicted with certainty, in the opinion of management, any liability that may arise from such contingencies would not have a material adverse effect on the financial position or results of operations of the Trust. Any expected settlement of claims in excess of amounts recorded will be charged to operations as and when such determination is made.

**NOTE 18**

*MANAGEMENT OF CAPITAL*

The Trust defines capital that it manages as the aggregate of its unitholders' equity and interest-bearing debt less interest-bearing receivables. The Trust's objective when managing capital is to ensure that the Trust will continue as a going concern so that it can sustain daily operations and provide adequate returns to its unitholders.

The Trust is subject to risks associated with debt financing, including the possibility that existing mortgages may not be refinanced or may not be refinanced on as favourable terms or with interest rates as favourable as those of the existing debt. The Trust mitigates these risks by its continued efforts to stagger the maturity profile of its long-term debt, enhance the value of its real estate properties and maintain high occupancy levels. The Trust manages its capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets.

The total managed capital for the Trust is summarized below:

<b>As at</b>	<b>Note</b>	<b>March 31, 2026</b>	<b>December 31, 2025</b>
Mortgages payable	7	<b>\$919,218</b>	\$924,994

Unitholders' equity		<b>869,460</b>	864,721
		<b>\$2,110,410</b>	\$2,100,584

The Declaration of Trust permits the Trust to incur indebtedness, provided that after giving effect to incurring or assuming any indebtedness (as defined in the Declaration of Trust), the amount of all indebtedness of the Trust is not more than 65% of the gross book value of the Trust's total assets as defined in the Declaration of Trust. The Declaration of Trust also permits the Trust to incur floating-rate debt, provided that the total amount of all floating-rate debt of the Trust is not more than 15% of the gross book value of the Trust's total assets.

The Trust's debt ratios compared to its borrowing limits established in the Declaration of Trust are outlined in the table below:

<b>As at</b>	<b>Borrowing Limits</b>	<b>March 31, 2026</b>	<b>December 31, 2025</b>
Fixed-rate debt to gross book value of total assets	N/A	<b>44.5%</b>	44.9%

#### *Mortgages Payable*

These ratios are evaluated by the Trust on an ongoing basis to ensure compliance. The Trust was in compliance with each of the financial covenants as at March 31, 2026, and December 31, 2025.

#### *Convertible Debentures*

The Trust's Convertible Debentures have no restrictive covenants.

#### *Bank Indebtedness*

## NOTE 19

### FINANCIAL INSTRUMENTS AND RISK MANAGEMENT

The Trust's financial assets and liabilities comprise cash, amounts receivable, accounts payable and accrued liabilities, bank indebtedness, Morguard loan payable, mortgages payable and convertible debentures. Fair values of financial assets and liabilities and discussion of risks associated with financial assets and liabilities are presented as follows:

#### FAIR VALUE OF FINANCIAL ASSETS AND LIABILITIES

The fair values of cash, amounts receivable, accounts payable and accrued liabilities, bank indebtedness and Morguard loan payable approximate their carrying values due to the short-term maturities of these instruments.

##### (a) Mortgages Payable

Mortgages payable are carried at amortized cost using the effective interest rate method of amortization. The estimated fair values of long-term borrowings are based on market information, where available, or by discounting future payments of interest and principal at estimated interest rates expected to be available to the Trust as at March 31, 2026.

The fair value of the mortgages payable has been determined by discounting the cash flows of these financial obligations using March 31, 2026, market rates for debts of similar terms (Level 2). Based on these assumptions, the fair value as at March 31, 2026, of the mortgages payable has been estimated at \$920,221 (December 31, 2025 – \$929,212) compared to the carrying value before deferred financing costs of \$921,717 (December 31, 2025 – \$927,871). The fair value of the mortgages payable varies from the carrying value due to fluctuations in interest rates since their issue.

##### (b) Convertible Debentures

The fair value of the Convertible Debentures is based on their market trading price (TSX: MRT.DB.A) (Level 1). The fair value as at March 31, 2026, of the Convertible Debentures has been estimated at \$159,716 (December 31, 2025 – \$161,385) compared to the carrying value before deferred financing costs of \$157,794 (December 31, 2025 – \$157,389).

##### (c) Fair Value Hierarchy of Financial Instruments and Real Estate Properties

The fair value hierarchy of income producing properties, properties under development, held for development and financial instruments measured at fair value in the balance sheets is as follows:

As at	March 31, 2026			December 31, 2025		
	Level 1	Level 2	Level 3	Level 1	Level 2	Level 3
<b>ASSETS</b>						
Income producing properties	\$—	\$—	\$2,053,643	\$—	\$—	\$2,053,453
Properties under development	\$—	\$—	\$18,582	\$—	\$—	\$17,499
Held for development	\$—	\$—	\$66,853	\$—	\$—	\$67,255
<b>LIABILITIES</b>						
Derivative liabilities	\$—	\$1,516	\$—	\$—	\$2,005	\$—

#### Risks Associated with Financial Assets and Liabilities

The Trust is exposed to financial risks arising from its financial assets and liabilities. The financial risks include interest rate risk, credit risk and liquidity risk. The Trust's overall risk management program focuses on establishing policies to identify and analyze the risks faced by the Trust, to set appropriate risk limits and controls, and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market

conditions and the Trust's activities. The Trust aims to develop a disciplined control environment in which all employees understand their roles and obligations.

## NOTE 20

### SEGMENTED INFORMATION

IFRS 8, "Operating Segments", requires operating segments to be determined based on internal reports that are regularly reviewed by the chief operating decision-maker for the purpose of allocating resources to the segment and assessing its performance. The Trust has applied judgment by aggregating its operating segments according to the nature of the property operations. Such judgment considers the nature of operations, types of customers and an expectation that operating segments within a reportable segment have similar long-term economic characteristics. As at March 31, 2026, and 2025, the Trust has the following three reportable segments: retail, office and industrial.
